TECHNICAL DATA SHEET

Coal based granular activated carbon

water treatment

Description

Coal-based granular activated carbon can effectively adsorb pollutants, remove odor and chroma, and inhibit microorganisms in water treatment, and is widely used in drinking water, sewage and industrial water treatment, with advantages of high adsorption capacity, mechanical strength and economy.

Specification

Particle size	2-4mm
Iodine value	800 mg/g
Raw Material	Coal based
PH	7
Bulk density	460±20 kg/m ³
Ash content	≤3%
Moisture	≤5%
Hardness	99%

DECACHEM DOO, Novi Sad, Serbia

Address: Lozionicka 14/9, 21000 Novi Sad, Serbia ;
PIB: 113353206 Matični broj: 21851396
